Kompete.ai

Monitor Continuously.
Predict Confidently.
Compete Strategically.

SaaS intelligence that keeps you 2 moves ahead of every competitor.

Kompete.ai Investor Deck - 2026

THE PROBLEM

The Limits of Traditional Competitive Analysis

📊

Manual Research Can't Scale

Even a dedicated team of pricing analysts can't process **hundreds of datapoints**-many of them qualitative-and synthesize a complete competitive story without missing something valuable. There's just too much happening simultaneously.

Result: Guaranteed blind spots. You're making strategic decisions with incomplete intelligence because manual analysis can't capture the full picture at scale.

💰

Consulting Delivers Point-in-Time Intelligence

Traditional consulting firms (Big 4 charge ~$200K per competitive assignment) deliver beautiful one-time reports. But the moment a competitor changes something, that deep research becomes outdated.

Result: Intelligence that expires the moment it's delivered. Companies pay once every 2-3 years for a 3-month project, then operate blind until the next engagement.

THE CORE ISSUE

Qualitative data (reviews, job postings, social media, messaging changes) is as valuable as quantitative metrics-but 100x harder to consolidate at scale. Traditional tools fail here. Analysts drown. Strategic windows close.

THE SOLUTION

Automated competitive intelligence that was never possible before

🤖

8 Specialized AI Agents

Pricing, Product, Sentiment, Market Position, GTM, Financial, Talent, Strategic Synthesis

📡

Multi-Source Intelligence

G2, Capterra, LinkedIn, Reddit, Twitter, job postings, product announcements

🎯

Predictive + Real-Time

Not just "what happened" but "what will happen next" with confidence scores

Our Approach

Continuous intelligence monitoring that catches competitive movements in real-time-not quarterly reports that become outdated the moment they're delivered.

HOW IT WORKS

System Architecture

Data Sources

Review Platforms
G2, Capterra, ProductHunt

Social Media
LinkedIn, Twitter, Reddit

Job Boards
LinkedIn Jobs, Indeed, etc.

Public Data
Websites, blogs, filings

8 AI Agents

- Pricing Agent
- Product Agent
- Sentiment Agent
- Market Position Agent
- GTM Agent
- Financial Agent
- Talent Agent
- Strategic Synthesis Agent

Intelligence Output

Real-Time Alerts
Positioning drift, pricing changes

Predictive Intelligence
Competitor moves, market shifts

Strategic Reports
Comprehensive analysis

Action Recommendations
Evidence-based strategies

Continuous Data Collection → AI Processing → Actionable Intelligence

KEY CAPABILITY

Continuous monitoring loop: System runs 24/7, analyzing hundreds of datapoints daily across all competitors. When patterns emerge or drift is detected, alerts trigger immediately-not weeks later.

KEY DIFFERENTIATOR #1

Qualitative + Quantitative Data at Scale

❌ TRADITIONAL APPROACH

Analysts manually read a handful of reviews. Can't process thousands of datapoints. Can't track Reddit threads, LinkedIn posts, Twitter mentions. Qualitative insights = anecdotal.

✅ KOMPETE.AI

AI agents analyze hundreds of datapoints across G2, Capterra, Reddit, Twitter, LinkedIn. Extract patterns humans miss.

Example: Implementation speed complaints vs competitors show perception gaps that create displacement opportunities.

Sentiment Deep-Dive Section

MULTI-SOURCE SENTIMENT ANALYSIS

BlackLine Criticism
G2: "Expensive" (12/18)
Reddit: "9mo impl"

HighRadius Praise
G2: "AI saved 40hrs/mo"
Twitter: "Better ROI"

Social Listening
Reddit: "Evaluating vs BL"
LinkedIn: "Switched"

Company	G2	Capterra	Est. NPS
HighRadius (You)	28	12	+42
BlackLine	18	8	+18

SAMPLE

THE UNLOCK

What was impossible: Analyzing 1000s of reviews + social mentions + hiring posts at scale.

What's now possible: Real-time sentiment tracking with NPS estimation across all competitive touchpoints.

KEY DIFFERENTIATOR #2

Positioning Drift Detection

⚠️ WHY THIS MATTERS

New customers only see what competitors are putting out today- current website messaging, latest ads, today's positioning. Historical context is invisible to them. If a competitor pivots messaging and you don't catch it, you lose the narrative battle.

❌ TRADITIONAL APPROACH

Static competitor spreadsheets. Manual checks every quarter. By the time you notice a competitor went silent on innovation, months have passed.

✅ KOMPETE.AI

Continuous timeline automatically tracks product announcements, messaging changes, M&A, hiring patterns. Decodes strategic intent in real-time.

Example: Acquisition signals product advantage windows

Example: Messaging shifts reveal market narrative changes while competitor messaging stays static

90-Day Drift Timeline

DEC 2025 - JAN 2026 COMPETITIVE MOVES

BlackLine — Maintenance
Minor UI update, Workiva partnership

HighRadius (You) — M&A
Acquired CloseIQ AI startup
→ 6-9mo product advantage

BlackLine (Jan) — Silent
No major announcements
⚠️ Silent while competitors accelerate

BLACKLINE
2 announcements
in 60 days

COMPETITOR AVG
4.3 announcements
215% higher velocity

SAMPLE

THE UNLOCK

What was impossible: Real-time tracking of competitive messaging, M&A, product velocity across dozens of signals.

What's now possible: Catch strategic pivots as they happen. 6-month extrapolation predicts BlackLine 3-4 releases behind by mid-2026.

KEY DIFFERENTIATOR #3

Predictive Intelligence with Confidence Scores

❌ TRADITIONAL APPROACH

Backward-looking: "Here's what happened last quarter." No forward guidance. Consultants guess but provide no confidence levels.

✅ KOMPETE.AI

Multi-signal analysis generates forward-looking predictions with **evidence-based confidence scores**. Not guesses-pattern recognition across hiring, messaging, M&A, tech stack signals.

High Confidence
Competitor launches AI product feature soon
Basis: Acquisition + ML engineers hired + messaging shift + patent filing

Medium-High Confidence
Competitor pricing pressure forces price reduction
Basis: Revenue slowdown + discount mentions + partner complaints

Predictive Intelligence Section

HighRadius AI Launch (You)
Autonomous reconciliation by March 2026
92% Confidence

SIGNAL BASIS
- CloseIQ acquisition (Dec 2025)
- 8 ML engineers (TensorFlow, PyTorch)
- "Autonomous Finance" messaging shift
- Patent: "AI variance detection"

BlackLine Pricing Pressure
Forced pricing drop within 6mo
81% Confidence

SIGNAL BASIS
- Revenue growth: 12% vs 28% prior
- G2: "quoted 40% less than last year"
- Partner: "aggressive discounting"

THE UNLOCK

What was impossible: Forward-looking competitive predictions with quantified confidence.

What's now possible: Know what competitors will do 6-9 months before they do it. Plan strategy accordingly.

KEY DIFFERENTIATOR #4

Evidence-Based Recommendations

(Not Consultant Opinions)

❌ TRADITIONAL APPROACH

Consulting firms deliver: "We recommend expanding into mid-market." Based on what? Partner expertise. Industry intuition. No evidence trail.

Cost: Expensive one-time assignments. Update frequency: Never.

✅ KOMPETE.AI

Every recommendation includes **"Why This Strategy"** with specific evidence: timing signals, competitive advantages, quantified impact, risk assessment.

Example Recommendation: Competitor Migration Program

Why:

- Timing: Pricing backlash at peak
- Evidence: High evaluation rate signals opportunity
- Advantage: Bundle pricing enables competitive positioning

Impact: Quantified revenue opportunity

Strategic Recommendations

1 Launch "BlackLine Migration Program"

Capitalize on 18% pricing increase + 34% dissatisfaction

WHY THIS STRATEGY

- **Timing:** Pricing backlash peak (G2 +127% YoY)
- **Evidence:** 34% evaluation = ~1,400 accounts
- **Advantage:** Bundle enables competitive pricing
- **Weakness:** Impl speed-address w/ guarantees

EXPECTED IMPACT

$15-25M ARR in 12mo (1-2% conversion)

2 Accelerate AI Reconciliation Roadmap

Maintain innovation lead with AI-first launch

WHY THIS STRATEGY

- **Timing:** Billtrust momentum validates demand
- **Evidence:** 6 G2 reviews cite AI as differentiator
- **Advantage:** CloseIQ + 8 ML = 6-9mo head start
- **Risk:** Billtrust ships first = lost positioning

EXPECTED IMPACT

+12% win rate in competitive deals

THE UNLOCK

What was impossible: Strategic recommendations with quantified evidence trails and impact forecasts.

What's now possible: Every strategy backed by specific datapoints. No opinions-only evidence.

WHY NOW

The Technology Unlock

⛔

Historical Constraint

Analyzing qualitative data (G2 reviews, job postings, messaging changes) required **armies of analysts**. Consolidating 1000s of signals was economically impossible.

🚀

LLM Breakthrough

Modern AI extracts structured insights from unstructured data at scale-**sentiment analysis, pattern recognition, drift detection**-making comprehensive intel accessible to every company.

⏰

Market Timing

Positioning drift accelerating (**3.2x faster product updates vs 2020**). Companies that can't track real-time competitive movements lose strategic windows.

The Wedge

Manual research can't keep pace with market velocity. AI makes competitive intelligence a **continuous stream** instead of a **quarterly snapshot**. This shift is happening **now**.

WHY US

Founder-Market Fit

📈

Track Record

Orbitshift.ai (B2B SaaS)

3x Growth

AI Product Manager - Scaled flagship product

Scaled B2B SaaS product 3x and accelerated throughput by 10x. Built and managed high-performance team of 10+ analysts with 0% regretted attrition.

🎓

Pedigree + Expertise

IIT Bombay + IIM Ahmedabad. 7+ years in B2B SaaS, GenAI (LLMs/Agents), and analytics. Led analytics vertical at HighRadius ($3Bn valuation). Program Manager at Amazon managing 600+ headcount ML programs.

Deep expertise in AI agents, product scaling, and team building. Built 0-to-1 products and scaled 1-to-N at startups and Fortune 500.

The Founder Insight

After interviewing pricing consultants and analysts at consulting and SaaS firms:

The core problems are clear-manual research can't scale, point-in-time intelligence expires instantly, and qualitative signals are impossible to

consolidate. AI agents can now solve this at scale, at a fraction of traditional consulting costs.

MARKET OPPORTUNITY

Fast-Growing Market, Three Converging Tailwinds

$1.5B+

COMPETITIVE INTELLIGENCE TOOLS MARKET

Source: Mordor Intelligence, 2025

Growing at **20% CAGR**, driven by AI adoption and faster product velocity. Mid-market SaaS segment growing even faster at **23.5% CAGR**.

Three Converging Tailwinds

🌊

1. AI/LLM Adoption

Companies now believe AI can analyze unstructured data. Our timing is perfect.

⚡

2. Development Velocity Increase

SaaS companies ship features and updates 3.2x faster than 2020. Manual research can't keep up.

💰

3. Democratizing Access

We deliver 75% of Big 4 insights at 1% of the price, making competitive intelligence affordable for early and mid-stage SaaS platforms.

Go-to-Market Strategy

Year 1: Vertical Focus

AR automation, fintech SaaS. Sell into product/marketing leaders. $50K-$150K ACV.

Year 2-3: Horizontal Expansion

Sales tech, HR tech, dev tools. Platform play across all B2B SaaS verticals.

BUSINESS MODEL

SaaS + Professional Services Hybrid

MARKET GAP

Big 4 consulting firms charge ~$200K per competitive intelligence assignment (one-time, point-in-time analysis). Existing SaaS solutions like Kompyte, Crayon, and Klue have **non-transparent pricing**, leaving a gap in the market for transparent, continuous intelligence at accessible price points.

SaaS Platform (80% of revenue)

Starter: $2,500/month
1 category, 3-5 competitors, monthly reports

Growth: $7,500/month
3 categories, 10+ competitors, bi-weekly updates

Enterprise: $15K+/month
Unlimited, real-time alerts, custom agents

Professional Services (20%)

Strategic Deep-Dives: $25K-$50K
One-time competitive audit with human analysts

Custom Agent Development: $50K+
Build proprietary intelligence agents for unique use cases

Unit Economics (Year 2 projection)

$90K	$15K	6:1	75%
Avg ACV	CAC	LTV:CAC	Gross Margin
